

# I-5 North Coast Corridor

## City of Encinitas: Proposed Enhancement Projects

The I-5 North Coast Corridor HOV/Managed Lanes Project proposes improvements to the highway's performance through the year 2030. Along with the highway improvements, this project has the opportunity to include a proposed phased build-out of enhancements to bike and pedestrian routes. These routes would enhance connectivity from the east side of the highway to the west side and enhance existing access to the coastline. Other proposed improvements include a new park, Park & Ride enhancements and wetland revegetation. These enhancement opportunities were developed through a community workshop process. Caltrans and FHWA, in partnership with the city, would build these features and the city would be responsible for maintaining them. A map is provided below that corresponds to the list of enhancement projects and descriptions on page 2.

**1 Manchester Avenue: Pedestrian Improvements**

This project proposes streetscape improvements and trail improvements that connect into the existing lagoon trail system. Along the south side of Manchester Avenue a new streetscape is proposed that would link to a proposed pedestrian bridge that would be suspended under the west side of I-5 running north to south. This bridge would connect to a new trail under I-5 on the south side of the lagoon that would connect to newly enhanced trails on the west and east sides of I-5. An added benefit is improved coastal access from these improvements via existing routes to the coastline.

**2a Villa Cardiff Drive: Park & Ride Improvement**

This project proposes improvements to the existing Park & Ride with park-like amenities, new trees and proposed trails to the north.

**2b Villa Cardiff Drive: Pedestrian Improvements and Bicycle Trail**

This project proposes streetscape improvements to a newly relocated MacKinnon Bridge, including new landscaping and hardscaping. It also proposes a pedestrian and bicycle trail on the east side of I-5, along Villa Cardiff Drive just south of the bridge.

**3 Hall Property Park to Santa Fe Drive: Pedestrian Trail**

This project proposes a new pedestrian route between Hall Property Park and Santa Fe Drive.

Hall Property Park pedestrian trail connecting to Santa Fe Drive.

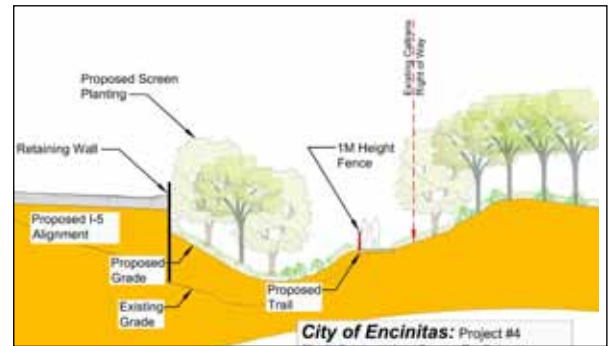

**4 Santa Fe Drive to Requeza Street: Pedestrian Trail with Wetland Revegetation**

In addition to restoring wetlands, this project proposes a new trail along the east side of I-5 between the bend in Regal Road to Requeza Street. This enhancement would be part of a new north-south linear park between Encinitas and Birmingham Drive on the east side of I-5. An added benefit of this enhancement would be an improved connection from the east side of I-5 to existing west side routes that lead to the coastline.

**5 Requeza Street to Encinitas Boulevard: Pedestrian Trail**

In addition to restoring wetlands, this project proposes completion of the north end of the existing trail along the east side of I-5 between Requeza Street and Encinitas Boulevard.

Pedestrian Trail Connecting Santa Fe Drive to Requeza Street.

**6a Union Street: New Pedestrian Overpass**

This project proposes a new bridge over I-5 at Union Street connecting west side uses such as a new small park and Cottonwood Creek to residential neighborhoods and recreational uses on the east side of I-5. An added benefit of this enhancement would be an improved connection from the east side of I-5 to existing west side routes that lead to the coastline.

**6b Union Street: New Pedestrian Trail and Wetland Revegetation**

This project proposes a new trail along the west side of I-5 that would connect from Cottonwood Creek Park to the new pedestrian bridge. In addition, wetland restoration and revegetation is proposed near the trail.

**6c Union Street: Park Enhancement**

This project proposes adding a new pocket park on the west side of I-5 at the Union Street pedestrian bridge.
