

State Route 78 Nordahl Road Bridge

March 2012

Construction Advisory: Full Freeway Night Closures at Nordahl Road and SR 78

Construction of the Nordahl Bridge Replacement began in late February. The first phase of work will demolish and replace the east side of the bridge (shown in red in the diagram).

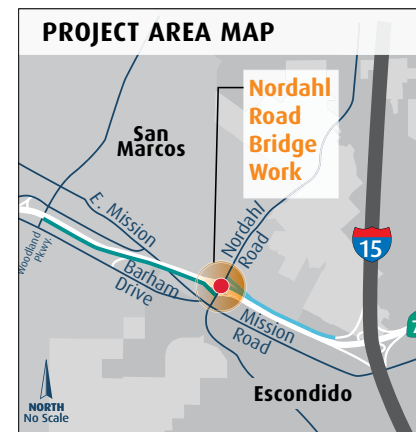

Motorists are advised that full freeway closures may be required at night for five days beginning Sunday, March 4th. These closures will be from 10pm to 5am. These closures are necessary to build a temporary pedestrian bridge (shown in green) by the end of next week.

During these nighttime closures, motorists are urged to avoid the area. Traffic delays are expected on Nordahl Road during these closures. Detours will be in place so that motorists exit SR 78 at the Nordahl Road off ramp and re-enter SR 78 at the Nordahl Road on ramp.

Additionally, If you have questions about this project or other projects located near SR 78 and I-15, Caltrans is holding an information Open House next week:

Wednesday, March 7, 2012 between 6-7 p.m.
San Marcos Community Center
3 Civic Center Drive, San Marcos

All members of the public and surrounding business areas are invited to learn about the projects that are occurring in the corridor. In collaboration, the cities of San Marcos and Escondido, the San Diego Association of Governments and Caltrans are investing \$41.1 million in these projects to address the severe congestion in this project area and prepare the SR 78 for future HOV lanes.
