

## A Comprehensive Approach for the North Coast Corridor

# PUBLIC WORKS PLAN

The Public Works Plan serves as a blueprint for the future of the North Coast Corridor that will improve circulation by integrating all forms of transportation including bicycles, pedestrians, trains, cars, and environmental enhancements.

## North Coast Corridor Program

The North Coast Corridor Program is a comprehensive \$6.5 billion package of highway, rail, transit, and environmental protection and coastal access improvements.

### Highway Improvements

- Adds four new Express Lanes on Interstate 5
- Creates new, modern, flexible transportation backbone
- Enhances mobility to support the future needs of the region

### Coastal Rail and Transit

- Invests more than \$400 million over five years
- Double tracks a large portion of the rail system from Oceanside to downtown
- Improves passenger travel times and freight movement

### Environmental Enhancements

- Acquires several hundred acres of sensitive coastal habitat
- Restores and sustains the health of the corridor's six coastal lagoons
- Adds bike and pedestrian paths
