

Building Today. Boarding Tomorrow.

E-News Update | May 2016

## Oceanside Transit Center Platform Improvement Project

### Construction at Station to Begin Next Month

Construction is scheduled to begin on a major expansion of the Oceanside Transit Center. The project will improve the efficiency and on-time performance of the station's transit operations by adding a third track, which allows for an additional train to move through the station when two trains are boarding passengers.

Other project improvements include constructing a new boarding platform to the south, extending an existing platform to the north to accommodate a ten-car train, adding new crossovers and turnouts to enhance rail operations, and modernizing the station's amenities with new shelters, directional lighting, seating, and electronic signs displaying real-time arrivals and departures. Construction is expected to be complete in late 2017.

More than 1.2 million passengers use Oceanside Transit Center each year.

## Construction Info Sessions

Prior to construction, the project team will host a series of Construction Info Sessions at the station so transit users and neighbors can learn more about the project, what to expect during construction, and sign up to receive project updates.

**Saturday, May 21 - 10:30 a.m. to 2 p.m.**

**Tuesday, May 24 - 5:30 a.m. to 9 a.m.**

**Wednesday, May 25 - 4:30 p.m. to 7:30 p.m.**

*The project team will be located near the pedestrian undercrossing at the station.*

We look forward to visiting with you.

## About Oceanside Transit Center

The Oceanside Transit Center was built over 125 years ago. What began as a small rail stop in a new coastal city has grown to become the busiest transit hub on the San Diego segment of the Los Angeles-San Diego-San Luis Obispo (LOSSAN) coastal rail line serving more than 220 trains and buses each weekday. Today, more than 1.2 million passengers annually board trains and buses. This project is a key part of the larger effort to improve rail infrastructure along the LOSSAN Coastal Rail Corridor. ## TRAIN HORN RULES

Federal regulations require train conductors to sound the horn when approaching an active construction site, even in a quiet zone. Train horns serve as a warning system to ensure the safety of railroad workers. More information and rules governing the use of train horns can be found on the Federal Railroad Administration's website at [www.fra.dot.gov](http://www.fra.dot.gov).
