

Oceanside Transit Center Platform Improvement Project

Upcoming Rail Grade Crossing Closure at Wisconsin Avenue

Crews will be closing the Wisconsin Avenue grade crossing from **Tuesday, September 20 to Friday, September 23**, in order to install electrical fixtures, irrigation lines, and other utilities. Public parking may be limited on the west side of the crossing. Detour signage will be in place to ensure that motorists and people walking and biking are able to cross the tracks using Oceanside Boulevard.

Drivers, bikers, and pedestrians are encouraged to follow the detour. Please note the Coastal Rail Trail will remain open during construction.

Crews Work to Put Finishing Touches on Platform Extension

Next week, crews will be working near Seagaze Drive to complete the easternmost platform extension. Work includes completion of the final paving of the new baggage cart crossing and installation of a temporary ramp between the new and existing platforms. Nighttime work will be occurring Monday - Friday, from 10 p.m. to 5 a.m. Nearby businesses and residents can expect noise and lights associated with construction activities.

Other daytime activities for the next two weeks will include the installation of signals and communications equipment for the new platform. Work schedules are subject to change.

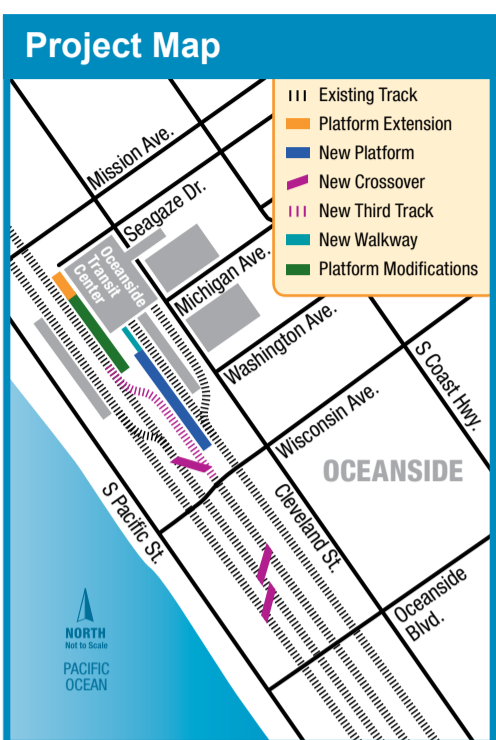

Crews will minimize noise and other impacts to the greatest extent possible. Thank you for your patience as we work to upgrade the Los Angeles-San Diego-San Luis Obispo (LOSSAN) coastal rail corridor.

About the Project

The project will improve the efficiency and on-time performance of the station's transit operations by adding a third track, which allows for an additional train to move through the station when two trains are boarding passengers. Other project improvements include constructing a new boarding platform to the south, extending an existing platform to the north, adding new crossovers and turnouts to enhance rail operations, and modernizing the station's amenities with new shelters, directional lighting, seating, and electronic signs displaying real-time arrivals and departures. Construction is expected to be complete in late 2017.

This project is a key part of the larger effort to improve and modernize rail infrastructure along LOSSAN coastal rail corridor. Please visit the webpage at KeepSanDiegoMoving.com/OTC to learn more.

TRAIN HORN RULES

Federal regulations require train conductors to sound the horn when approaching an active construction site, even in a quiet zone. Train horns serve as a warning system to ensure the safety of railroad workers. More information and rules governing the use of train horns can be found on the Federal Railroad Administration's website at www.fra.dot.gov.
