SANDAG and the North County Transit District are hosting an open house on the San Dieguito Double Track and Special Events Platform Project.

Project team members will discuss and answer questions about the project's Environmental Assessment (EA), which is being made available to the public. The EA has been prepared in accordance with the National Environmental Policy Act (NEPA), and the Federal Railroad Administration is the project's lead agency under NEPA.

Pending funding, the project would construct a one-mile stretch of second main track between Solana Beach and Del Mar, replace the nearly 100-year-old wooden trestle rail bridge over the San Dieguito River, and add a special events rail platform on the west side of the Del Mar Fairgrounds. The project is part of the North Coast Corridor Program, a comprehensive package of highway, rail and transit, and coastal access improvements, which spans 27 miles from Oceanside to La Jolla.
